FLYING, FEATHER AND WING BANNER
RATCHET

We at Expand a Sign believe in continuous improvement and are constantly looking for better ways of doing things; from brighter inks and stronger fabrics to eye-catching shapes and better functionality for portable branding products.

Our latest innovation is the ratchet which we have attached to the cords of the Flying, Feather and Wing Banners, replacing the existing cleat! We are also currently testing this on the guy ropes of the Ex-Dome Gazebo.

The ratchet allows for easy tensioning of the banner.

- If the banner is too loose, pull the cord to adjust the tension.
- If the banner is too tight, press the button on the ratchet to release the tension.
