CARING FOR YOUR *Branding*

CARE INSTRUCTIONS

The longevity of your branding depends on the colour as well as the environmental factors such as traffic, pollution, sunshine, wind and rain.

- Always ensure products are setup with a 360° all-round clearing so that they do not rub against walls, plants, trees, street lights etc.
- Always remember to tie down products that need to be tethered.
- To increase the life-span of your branding, take it down at night and in windy conditions where the windspeed exceeds 45 km/h.
- Remember colour lasts longer in the shade.
- If the branding is used on a daily basis, we recommend cleaning them once a month.
- In the case of rain and condensation, be sure to dry the branding before packing it away.

WASH INSTRUCTIONS

Clean with warm, soapy water (30°C/75°F) or a cold, gentle machine wash (excluding inflatables - use high pressure cleaner)

Do not bleach

Steam Iron only

Do not tumble dry

Do not dry clean

Dry thoroughly before packing away
